Courses, seminars

2025.04 Udemy

63 h

Solidworks

I gained a solid understanding of the most commonly used SolidWorks features used by professionals.
I learned to work independently on designs in any version of SolidWorks by thinking like a professional design engineer.
I covered the basics and prepared for the Certified SOLIDWORKS Associate (CSWA) exam with confidence.
I practiced making complex models using a combination of tools through examples and exercises.
I worked on curated projects that I can include in my resume.
Covered modules: Sketching, Part Design, Assembly Design, Drafting, Sheet Metal, and Finite Element Analysis (FEA).

Have certificate

2025.03 Udemy

45 h

AutoCAD

I have completed an AutoCAD course where I learned the fundamentals of 2D drafting and 3D modeling, including drawing tools, parametric design, and transformation techniques. I gained hands-on experience with the latest AutoCAD features, explored differences between versions, and worked on real-world industrial projects. Additionally, I practiced with mock interviews and certification questions, improving my technical skills for professional applications.

Have certificate

2025 Udemy

10 h

Jira

I gained a JIRA certificate, where I learned how to use and administer JIRA in Agile teams. I worked with Scrum and Kanban boards, managed backlogs, sprints, and issues, and configured workflows, fields, and permissions. I also learned how to use Confluence and integrate it with JIRA to improve productivity.

Have certificate

2025 Udemy

7 h

Active Directory

I earned an Active Directory certificate, where I learned to deploy and manage domain controllers, including RODCs, using both GUI and PowerShell. I worked with OU, domain, and forest design, managed FSMO roles, users, computers, and groups. I also planned AD Sites, managed replication, performed migrations, and set up Certificate Services.

Have certificate

2025 Udemy

10 h

SCCM

I completed an SCCM course where I learned to install and configure SCCM from scratch, manage users and boundary groups, deploy applications and operating systems, and integrate Endpoint Protection. I also learned how to monitor deployments, troubleshoot errors, and administer the latest version of SCCM effectively.
